

2011 GMC Sierra HD

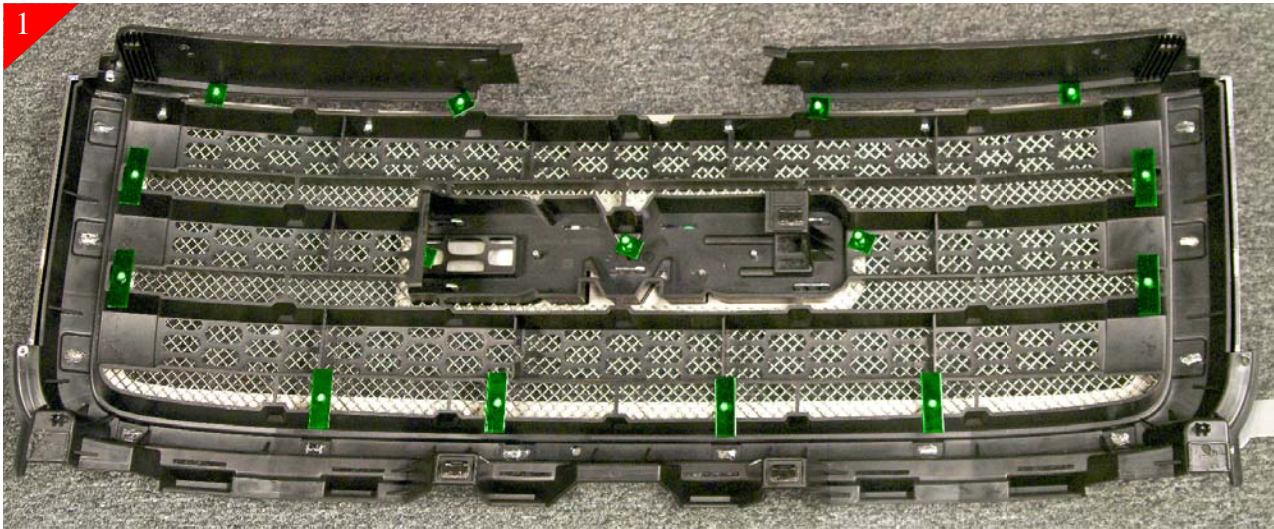

"Mesh Bolt Over"

After

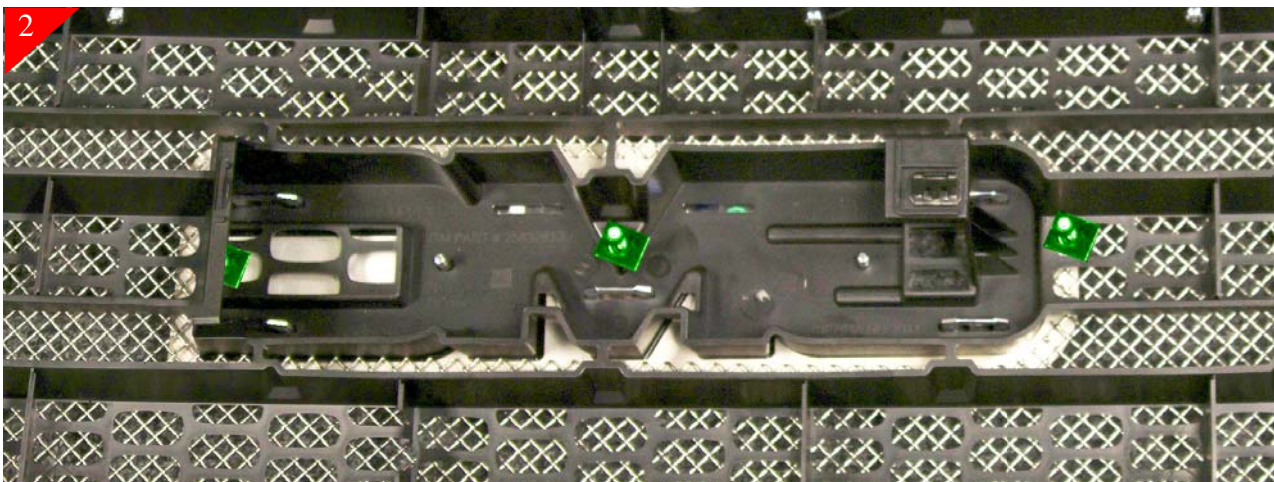

PART# 38052 - (Polished) 38053 - (Black) Upper

Hardware

- 15 - 10-24 Nyloc Nuts
- 7 - "Small Square" Brackets ■
- 8 - "Rectangle" Brackets ■

First locate the main outer trim ring and the mesh center. Lay trim ring on a protective work surface, next place the mesh and align so that the mesh clears the mounting studs. Next place trim ring and mesh into stock grille shell opening and center. Place the supplied brackets in place and secure with the supplied 10-24 nyloc nuts. Check alignment before final tightening of the nuts.

Place GMC trim ring so it clears the GMC logo and the studs clear the mesh and stock shell. Place the supplied small square brackets in place and secure with the supplied 10-24 nyloc nuts. Check alignment before final tightening of the nuts.
