

TOOLS REQUIRED:

- Files
- 7/16 Wrench
- Phillips Screwdriver
- Drill
- 3/16 Drill Bit

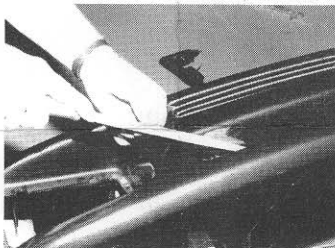

1994 S-10 Grille Installation Instructions

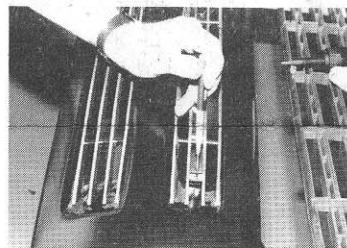

STEP 1 Unwrap two grille pieces. Note "T" on the bolt tab of one piece which designates it as the "TOP" section.

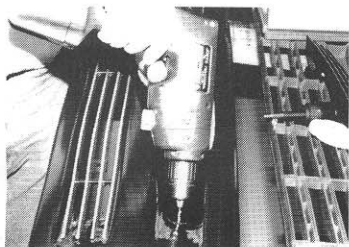

STEP 2 With the bolts provided, install the mounting brackets to the grille piece, but do not tighten.

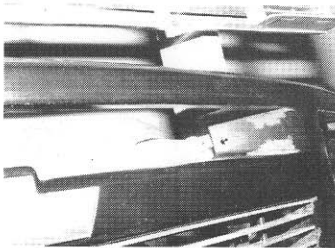

STEP 3 Trial fit the grille. File rounded corners of the grille shell square, being careful not to file through the plastic.

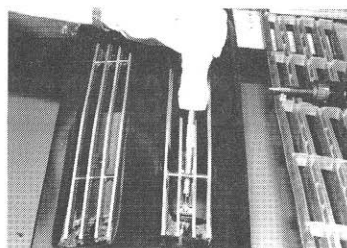

STEP 4 Center the grille in the opening and scribe through the holes in the mounting brackets where holes must be drilled in the shell.

STEP 5 Drill 1/4" holes where marked.

STEP 6 Install clips over drilled holes. Touch up paint where corners of opening were filed.

STEP 7 Put grille in place and secure with sheet metal screws provided. Tighten bolts holding the brackets to the grille. Repeat the procedure to install the bottom grille section.

NOTE: Photos show the installation done with the grille shell removed. However, installation can be done with grille shell on vehicle.
