Hardware

4 - 10-24 x 2" Toggle Bolt Assemblies

1. Place the supplied 10-24 x 2" bolt through the mounting tab in billet grille and then thread the bolt onto the wing portion (Fig B). Place Billet grille into bumper opening pushing toggle bolts through stock grille shell. Tighten bolts without over tightening--over tightening could cause the stock grille shell to crack. Note: A drop of red/blue loctite on the bolt threads with significantly reduce the chance of bolts backing out due to road vibrations.
